OpenAir™

Damper Actuator Modbus RTU

G..B111.1E/MO

Damper actuator 5 / 10 Nm with Modbus communication

GDB111.1E/MO Operating voltage AC 24 V, 5 Nm
 GLB111.1E/MO Operating voltage AC 24 V, 10 Nm

• For air-handling units (AHU) and other ventilation applications

- Operating voltage AC 24 V
- 5 and 10 Nm nominal torque
- Modbus RTU communication
- UL listed

Functions

Function	Description
Communication	Modbus RTU (RS-485), galvanically separated
Functions	 Setpoint 0100% Actual value for position 0100% Override control Open / Close / Min / Max / Stop Setpoint monitoring and backup mode
Supported baudrates	9.6, 19.2, 38.4, 57.6, 78.4, 115.2 kbaud
Supported transmission formats	1-8-E-1, 1-8-N-1-, 1-8-O-1, 1-8-N-2
Termination	120 Ω electronically switchable
Supported Modbus function codes	03 Read Holding Registers, 04 Read Input Registers, 06 Write Single Register, 16 Write Multiple registers (max. 120 registers within one message)

For a detailed description of specific functions please refer to the product documentation CE1Z4634 $^{1)}$.

Type summary

Product no.	Stock no.	Operating voltage	Positioning signal	Power consumption	Posit. time	Manual adjuster	Position feedback

Please refer to data sheet N4698 for information on accessories and spare parts.							

²⁾ Actuator rotates

Ordering (Example)

Product no.	Stock no.	Description	Amount
GDB111.1E/MO	S55499-D191	Damper actuator Modbus	1

Equipment combinations

Product no.	Stock no.	Description	Doc. type	Doc. number
AST20	S55499-D165	Handheld tool for commissioning	Datasheet	A6V10631836 1)
		and service	Operating manual	A6V10555077 1)

Product documentation

Title	Topic	Document ID
Rotary damper actuators without spring return GDB/GLB1	Detailed information about rotary actuators without spring return (5/10 Nm), incl. Modbus types	CE1Z4634 1)
Installation Instruction	Mounting / installation instruction for rotary actuators 5 / 10 Nm	M4634 1)

¹⁾ Related documents such as environmental declarations, CE declarations, etc., can be downloaded at the following Internet address: http://siemens.com/bt/download

HMI (Human-Machine Interface)

For more detailed explanations on device states, functions and error display, cf. product documentation CE1Z4634 ¹⁾.

Push-button operation

Activity	Push-button operation	Confirmation
Display current address (in reverse order)	Press button < 1s	Current address is displayed
Enter Modbus address with push-button	Press button > 1s and < 5s	See description next page
Enter push-button addressing mode (for use with Climatix [™] controllers)	Press button > 5s and < 10s	LED shines orange (release button when red LED gets dark). Timeout after 1 min.
Reset to factory settings	Press button > 10s	LED flashes orange

LED colors and patterns

Color	Pattern	Description			
Green	steady	Start-up			
	1s on / 5s off	Fault free operation ("life pulse")			
	flashing	Bus traffic			
Orange / green	1s orange / 1s green	Device is in override control			
Orange	1s on / 1 off	Bus parameters not yet configured			
Orange	1s on / 5s off	Backup mode entered			
Red	Steady	Mechanical fault / device jammed			
	1s on / 5s off	Internal error			
	0.1s on / 1s off	Invalid configuration, e.g. Min = Max			

Resetting the device by push button

The damper actuators can be reset by push-button:

- 1. Press button for >10s → LED starts flashing orange
- 2. Release button while LED still flashes → LED keeps flashing for 3s
- 3. If the button is pressed within these 3s, the reset is cancelled.
- 4. After those 3s → LED shines red (reset), then green (start-up).

¹⁾ Related documents such as environmental declarations, CE declarations, etc., can be downloaded at the following Internet address:

Display current address (digits in reverse order)

The Modbus address can be set without a separate tool by using the push-button and LED.

To display the current address, press button <1s.

Set new address (digits in reverse order)

- Enter addressing mode: press button > 1s until LED shines red, then release button (before LED gets dark).
- Enter digits: press button n-times → LED flashes per button press (feedback).
 Colors: 1-digits: red / 10-digits: green / 100-digits: orange
- 3. Store digits: press button until LED shines in color of following digits release button,
- 4. Save address: press button until LED shines red (confirmation) → release button. An address can be stored at any time, i.e. after setting the 1-digits, or after setting the 1-and the 10-digits.
- 5. Entered address is repeated one times for confirmation.

Note: If button is released before LED shines red, the address is discarded.

Examples

Set address "124":

- 1. Enter addressing mode
- 2. Set 1-digits: Press button 4-times → LED flashes red per button press
- 3. Store 1-digits: press button until LED shines green release button
- 4. Set 10-digits: Press button 2-times → LED flashes green per button press
- 5. Store 10-digits: press button until LED shines orange release button
- 6. Set 100-digits: Press button 1-times → LED flashes orange per button press
- Store address: press button until LED shines red release button
 → address is stored and displayed 1x for confirmation

Set address "50":

- 1. Enter addressing mode
- 2. Skip 1-digits: Hold button pressed until LED shines green release button
- 3. Set 10-digits: Press button 5-times → LED flashes green per button press
- Store address (skip 100-digits): hold button pressed until LED shines red

 release button
 - → address is stored and displayed 1x for confirmation

Set address "5":

- 1. Enter addressing mode
- 2. Set 1-digits: Press button 5-times → LED flashes green per button press
- 3. Store address: press button until LED shines red
 - → address is stored and displayed 1x for confirmation

For a detailed description of specific functions please refer to the product documentation Z4634 $^{1)}$.

Notes

Safety

▲ Caution

National safety regulations

Failure to comply with national safety regulations may result in personal injury and property damage.

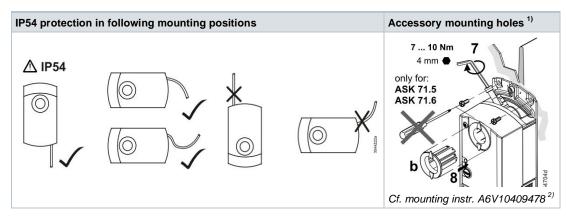

Observe national provisions and comply with the appropriate safety regulations.

Mounting

- Do not open the damper actuators
- Do not use the accessory mounting holes for fixation of the damper actuators

Mounting

Mounting positions

A 1) Not to be used for fixation of the actuator, use anti-rotation-bracket instead.

http://siemens.com/bt/download

²⁾ Related documents such as environmental declarations, CE declarations, etc., can be downloaded at the following internet address:

Parameterization

The following parameters must be checked or set prior to commissioning:

Parameter	Range	Description	Factory setting
Opening direction	CW (R) / CCW (L)	Opening direction of air damper	CW (R)
Adaptive positioning	Off / On	Adaption of actual opening range to position feedback Off = No adaption / mapping $0^{\circ}90^{\circ} \rightarrow 0100 \%$ On = Pos. adaption / mapping e.g. $0^{\circ}60^{\circ} \rightarrow 0100 \%$	Off

Commissioning workflow 1: Full or partial configuration by tool

When using the AST20 handheld tool, all bus and actuator parameters can be set.

- Connect the AST20 to the damper actuator and navigate to the bus configuration menu
- Set bus parameters as desired
- Optionally make changes on actuator parameters.

Note

With AST20, all parameters can be set using the mass configuration function. The bus parameters are included in the mass configuration function. It can be selected that the address is automatically incremented with each programmed damper actuator.

Commissioning workflow 2: Configuration over bus (full or partially)

The devices can be configured over bus if the pre-commissioning settings allow for a connection between the Modbus master / programming tool and peripheral devices (i.e. non-conflicting addresses and matching baudrate / transmission format).

- Full configuration over bus: If the address is unique per segment when powered up, the
 device can be accessed by the Modbus master (or programming tool) and the address
 and other parameters can then be set to the definitive values.
- Partial configuration over bus: If the address is not unique per segment when powered up, each device must get a non-conflicting address before connecting it to the bus (e.g. using the push-button addressing method). After addressing all devices, the remaining configuration can be done over the bus using the default settings for baudrate (auto-baud) and transmission mode for the Modbus master.
- Overwriting the bus configuration over bus uses a timeout. If "1 = Load" is not written into Reg 768 within 30 seconds, all values are discarded.

Example: Table shows bus configuration registers before and after changing them over bus.

Reg.	Name	Pre-commissioning	New value (ex.)
764	MacAddress	46	12
765	Baudrate	0 = auto	1 = 9600
766	Transmission Mode	0 = 1-8-E-1	3 = 1-8-N-2
767	Termination	0 = Off	0 = Off
768	BusConfigCmd	0 = Ready	1 = Load

Maintenance

The damper actuators are maintenance-free.

Disconnect the electrical connections from the terminals if you want to work at the device.

Disposal

The device is considered an electronics device for disposal in terms of European Directive 2012/19/EU and may not be disposed of as domestic garbage.

- Dispose of the device through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.

Warranty

Technical data on specific applications are valid only together with Siemens products listed under "Equipment combinations". Siemens rejects any and all warranties in the event that third-party products are used.

Internal diagrams

The damper actuators are supplied with a prewired connecting and communication cable. All interconnected devices must be connected to the same G0.

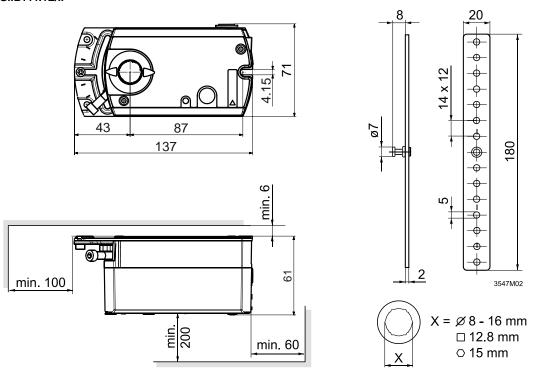

Core	Core color	Terminal			AV AV						
desig.		code				1	6	8	9		
1	red (RD)	G	System voltage AC 24 V		_	(G)	(REF)	(+)	(-)		
2	black (BK)	G0	System neutral AC 24 V				(M)	Tool			
6	violet (VT)	REF	Reference		L						
8	grey (GY)	+	Bus (Modbus RTU)			(G0)					
9	pink (PK)	-	Bus (Modbus RTU)			2					

Note

The operating voltage at terminals G and G0 must comply with the requirements under SELV or PELV. Safety transformers with twofold insulation as per EN 61558 required; they must be designed to be on 100 % of the time.
